

## Changing calendar colors in Wordpress

1. In the dashboard go to “calendar”
2. Select “calendar options” see example **1**
3. Use color picker for you hex code colors <http://www.colorpicker.com/> place a # in front of the color code.
4. Select code color to change (font, background, border, etc.) see example below:**2**. You can change the color hex number.

**Example of code below:** Color hex number in red example below that you can change in wordpress-calendar. Color #000000 is black for example. The code is an example of the default calendar coding. If you want to restore the calendar coding copy and paste the code below into the area in the example above **2**. There is also a check box at the bottom of the code window to restore the original code
